

OVERVIEW

Model risk assessments (School Operations and School Premises) and supporting guidance on operating procedures have been developed for maintained schools and settings in consultation with our Trade Union colleagues and relevant service areas. Each maintained setting should undertake their own risk assessment following this format – Cumbria County Council, as the employer in the above settings will support and guide Governing Bodies and School Leaders to manage a planned and safe gradual return to school but recognise that local decisions to open or not **MUST** follow a risk-based approach appropriate to the resources and capacity of each individual setting. Other types of schools are welcome to use these models to help their own planning and risk assessment approach but must ensure that they prioritise their own employer's health and safety management procedures.

This document is a template to be used to help Governing Bodies and Headteachers develop and tailor a site-specific risk assessment in relation to COVID-19. Below is a list of potential of hazards within our premises and the recommended control measures which apply to the majority of settings to aim to help you manage risks to the lowest possible level. Controls shown follow current available guidance and best practice.

Headteachers and Governing Bodies are responsible for monitoring the advice and guidance available, ensuring risk assessments and safe working practices are updated where applicable and cascaded through to employees. They must ensure that compliance is monitored, and any emerging issues addressed appropriately.

You should refer to the CCC guidance provided to accompany this model as well as referenced national guidance. **PLEASE NOTE** that your risk assessments should outline **YOUR** agreed control measures following your local planning processes – any additional control measures you identify as being required should be added to the additional controls column, along with who is responsible and a timescale.

All employees working within the premises should receive site specific information on the controls implemented within their workplaces.

Help and support with the development of your risk assessment is available through the County Council's Corporate Health and Safety Team at healthandsafety@cumbria.gov.uk . **School also engages Health consultants Kym Allen Associates who provide a series of supporting documents and advice.**

Please note that the Local Authority is liaising with contractors working on its behalf to ensure that they are undertaking effective liaison with occupiers **BEFORE** attending site – contractors are asked to provide key information in relation to how they are managing infection control.

This risk assessment refers to current national guidance, which is listed at the end of this document, and within accompanying guidance.

Following a request from the Education Planning Group, we have reviewed and updated the Model COVID-19 risk assessment to reflect recent changes to the Government guidance regarding Lockdown and Clinically Extremely Vulnerable Staff.

05/01/2021 This risk assessment was updated following the latest Government announcement for Cumbria moving into National Lockdown and new arrangements that will affect some schools. This does not replace your existing risk assessment but can be used to review/amend your existing controls. In addition, having had a period of school closure due to positive Coronavirus tests until 3.2.2021 we have made further alterations. All changes in **red**.

12/5/2021: This risk assessment has been further updated, with regards to the easing of restrictions planned for May 17th 2021 contained within the adapted Government guidelines for May 2021. Also after consultation with Kym Allen Associates, St George’s Staff and Governors and Feedback to parents. All new changes are in purple.
